

# Colored Cable Ties

## Cable Ties

Tork colored cable ties are produced from Polyamide 6.6 material, which is known as the most durable among plastics. It has high strength and hardness thanks to its semi-crystalline structure. Thanks to these structural features, Tork standard cable ties are the most suitable material to work with under load due to their very high bending and tensile strength and low friction coefficient.

Tork colored cable ties are used to distinguish and identify circuits and power lines with different colors. Tork colored cable ties, which are also used in personal applications, are used in many different areas of life such as decoration, wiring, home electronics.

- Only high quality plastic that can be recycled in nature is used
- Wide variety of materials, sizes and colors
- High tensile strength with low application force
- Serrated inner surface to grip the application area more tightly
- Edge surface slope for easy application
- Easy application manually or with apparatus

### Technical Specifications

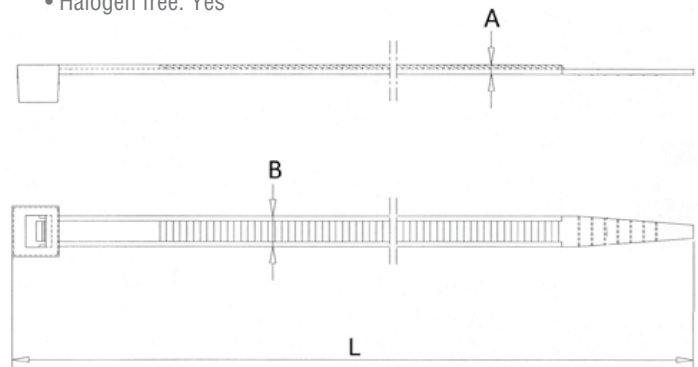

- Raw material: Polyamide 6.6
- Moisture Absorption: 2.7% (50% relative humidity)
- Working temperature: -40 ° C + 85 ° C
- Application temperature: -10 ° C + 60 ° C
- Combustion degree: UL 94 class HB
- Halogen free: Yes

### Application Areas

- Electricity Industry
- Industrial cabling
- Automotive
- Energy sector
- Building and construction sector

### Certifications

Reach, Rohs, Halogen free,

### Box content

Product Code	Size			Colour	Tighten Range	Max Tensile Strength	Quantity In a Nylon Bag	Quantity In a Carton Box
